Ministry of Higher Education, Research and Innovation

The Ministry of Higher Education, Research, and Innovation aims to promulgate and give better access to higher education. Government policy is geared towards innovation, the promotion of science and new technologies, as well as the analysis and development of educational programmes in higher education institutions. The ministry thus ensures the supervision of educational establishments as well as research organisations. In particular, it plays a key role internationally, as it disseminates scientific, technological, and industrial culture while establishing, according to government decisions, a global network of research universities.
